## Experience

○ **10/2023 - 10/2025**

Workiom | turkey (Hybrid Remote)

### Senior Mobile Application Developer.

Architected and launched a Flutter-based SaaS product for iOS and Android, managing the complete development process from concept to App Store submission. Ensured strict compliance with platform guidelines and built the application using modern Flutter, state management, REST APIs, and WebSockets to deliver a pixel-perfect UI from Figma designs.

○ **05/2023 - 11/2023**

SELLanyAD | germany(Remote)

### Mobile Application Developer

Building a social media platform that enables seamless connections between users, business owners, and influencers. Implementing WebRTC for real-time video and voice calls, integrating scalable backend services, and optimizing performance with state management, Firebase, and RESTful APIs. Experienced in third-party SDKs, push notifications, and real-time messaging to enhance user engagement.

○ **11/2022 - 05/2023**

focus | Damascus, Syria

### Mobile Application Developer

Leading the Mobile App Team to develop a transport app with real-time updates. Using Google Maps, WebSocket, REST APIs, FCM, location packages, with efficient state management. Collaborating with Figma for a seamless UI/UX.

○ **10/2020 - 10/2022**

Freelancer| Damascus, Syria

### Full-Stack Mobile Application Developer

Orchestrated the end-to-end development of custom applications for diverse clients, transforming requirements into high-quality, performant solutions. Managed the entire project lifecycle from planning and backend development to Mobile integration and deployment, ensuring on-time delivery and client satisfaction.
