

Khaled Sawan

Software Engineer

Senior Software Engineer with experience architecting and delivering production systems across mobile and full-stack environments. Proven in owning the full software lifecycle—from system design and backend integration to mobile and frontend delivery. Specialized in real-time features, scalable application architecture, and secure, high-performance products. Strong track record of translating business requirements into reliable, production-ready software.

Arabic

Experience

10/2023 - 10/2025

Workiom | turkey (Hybrid Remote)

Senior Software Engineer – Mobile Platforms.

Led the architecture and development of a cross-platform Flutter SaaS application, defining core technical foundations including app architecture, state management strategy, API integration, and real-time communication layers. Owned the full engineering lifecycle from requirements and technical design to CI/CD release and production deployment. Built scalable, maintainable mobile systems aligned with platform guidelines and performance best practices, delivering a high-quality product from Figma prototypes to store-ready applications.

05/2023 - 11/2023

SELLanyAD | germany(Remote)

Software Engineer – Mobile Platforms

Engineering a scalable social platform with real-time video, voice, and messaging. Designing mobile architecture and WebRTC communication layers, integrating cloud services and REST APIs, and optimizing performance with structured state management. Delivering production features including push notifications and third-party SDK integrations.

11/2022 - 05/2023

focus | Damascus, Syria

Software Engineer – Full Stack

Led engineering of a real-time transportation platform across mobile, frontend, and backend systems. Architected Flutter applications and backend services, built live data pipelines, and integrated web frontends with mobile and server APIs. Implemented global and regional e-payment systems across the full stack, delivering secure, high-reliability, location-based features.

10/2020 - 10/2022

Freelancer | Damascus, Syria

Full-Stack Software Engineer (Mobile & Web)

Led end-to-end engineering of custom products for multiple clients, translating requirements into scalable system designs and production applications. Owned architecture and development across backend services and mobile clients, delivering high-performance solutions from technical planning through deployment.
