Damascus, Syria, Mazzeh

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience specialising in **Flutter mobile development and .NET backend systems**. Proven track record of delivering scalable production applications serving 10,000+ users, including SaaS platforms, real-time systems, and e-commerce solutions.

Strong expertise in **Clean Architecture, real-time communication, and full-stack system design**, with hands-on experience across the full development lifecycle — from system architecture and backend development to deployment and app store releases.

TECHNICAL SKILLS

Languages & Frameworks: Flutter (Dart), ASP.NET Core (.NET), REST APIs

Mobile Development: Flutter (Clean Architecture, State Management), Native integrations (Kotlin, Swift – basic)

Backend & Cloud: ASP.NET Core, Firebase Tools, VPS Deployment, DevOps basics

Architecture & Tools: Clean Architecture, CI/CD, Git, API Integration, Real-time Systems

Other (Secondary): Laravel, Node.js, JavaScript, HTML, CSS

PROFESSIONAL EXPERIENCE

Freelance Software Engineer & Business Owner *Oct 2025 – Present*

- Continuing collaboration with **Workiom** as a freelance engineer, contributing to feature development and system improvements
- Delivering freelance projects across **Flutter mobile applications and .NET backend systems**
- Designing and deploying full-stack solutions including APIs, mobile apps, and cloud infrastructure
- Managing client relationships and delivering end-to-end production systems
- Running and scaling personal e-commerce business (Sawan Honey)

Senior Software Engineer – Mobile Platforms

Workiom (SaaS Platform) — Remote / Turkey *Oct 2023 – Oct 2025*

- Led development of a production Flutter SaaS application serving **15,000+ active users**
- Designed scalable mobile architecture using **Clean Architecture and structured state management**
- Integrated complex **.NET backend systems** with real-time communication
- Implemented secure authentication, role-based access, and high-performance data layers

- Managed full lifecycle: development, CI/CD, monitoring, and app store releases
- Integrated Firebase tools (Analytics, Crashlytics, Notifications)

Software Engineer – Mobile & Real-Time Systems

SELLanyAD — Remote / Germany May 2023 – Nov 2023

- Built a real-time social platform supporting **video, voice, and messaging features**
- Developed Flutter applications with native integrations (Kotlin, Swift)
- Integrated WebRTC and cloud services for real-time communication
- Implemented scalable messaging and media handling systems

Full-Stack Software Engineer

Focus — Damascus, Syria Oct 2022 – Jun 2023

- Developed a real-time transportation platform with **5,000+ concurrent users**
- Built Flutter mobile apps and backend systems for live tracking services
- Designed and implemented a **complete online payment system**
- Integrated multiple payment providers (MTN, Syriatel, Fatora, E-Cash, E-Lira, Sama Pay)
- Managed deployments (servers, databases, app stores)

Full-Stack Software Engineer | Freelance Projects Oct 2020 – Oct 2022

- Delivered production-ready systems including mobile apps, backend services, and dashboards
- Built backend platforms and APIs for client projects
- Developed admin dashboards using Flutter Web and modern web technologies
- Deployed and maintained full systems (servers, databases, cloud services)
- Worked directly with clients to deliver end-to-end solutions

Founder & Full-Stack Engineer

Sawan Honey E-Commerce Store Nov 2025 – Present

- Built and deployed a complete e-commerce platform
- Developed backend system and admin dashboard
- Implemented ordering workflow and customer interaction system
- Managed hosting, server configuration, and system maintenance

KEY PROJECTS

Flutter Clean Architecture Generator Tool (.NET ABP SaaS)

- Developed a tool that generates Flutter applications from API documentation
- Implemented **Clean Architecture with automated project scaffolding**
- Reduced development time and improved consistency across projects

EDUCATION

B.Sc. in Information Technology Engineering Damascus University — Syria 2019 – 2025

Specialisation: Software Engineering & Information Systems

LANGUAGES

- Arabic — Native
- English — Professional
